

SPORT LIGHT

PQ-SPL

IN OBSERVING THE IMAGE BELOW, YOU CAN SEE THE LOCATIONS OF THE FASTENING POINTS BOTH ON THE BRACKET AND ON THE LUMINAIRE

1. Attach the bracket to the base of the 3D swivel mount.
2. Secure the screws.

3. Adjust the bracket accordingly to achieve the desired angles.
4. Tighten the screws completely.

THE INSTALLATION OPTIONS CAN BE CUSTOMIZED ACCORDING TO YOUR PREFERENCES FOR THE SPL LUMINAIRE

“First Installation Method”

1. Place the bracket on the installation support;
2. Attach the bracket using the M20 and M10 screws (do not fully tighten them).

“Second Installation Method”

1. Adjust the bracket and the fixture both vertically and horizontally as indicated
2. Tighten the screws fully.

1. Attach the bracket to the light pole.
2. Tighten the screws.

3. Adjust the bracket accordingly to achieve the desired angles.
4. Lock the screws on the SF bracket.

White	--N--				N	N
Green					GND	GND

Make sure the safety cable is securely attached.

The luminaire must be secured with an individual safety cable.

IMPORTANT GUIDELINES FOR SPL LUMINAIRE INSTALLATION

1. Read the manual carefully before proceeding with the installation, and make sure to turn off the power beforehand.
2. Only a qualified individual or engineering professional should perform the luminaire installation.
3. Before starting the installation, ensure that the local electrical voltage matches the luminaire’s requirements.
4. In case of luminaire damage, it is imperative to have it replaced by the supplier, an authorized maintenance agent, or a qualified person.
5. Ensure that the luminaire is protected against fire hazards, electrical shocks, and vibrations.
6. Using a safety rope during luminaire installation is highly recommended.
